

5 **METHOD FOR EXTRACTING INFORMATION ASSOCIATED WITH A
SEARCH TERM**

Abstract of the Disclosure

10

 Extracting tagged data items that may be associated with results of a search in an
electronic document and presenting the tagged data items through a graphical user
interface (GUI). The tagged data may be presented in a separate window displaying
search results. The tagged data items may be presented adjacent to individual search
15 results or at the top of a window displaying search results. The displayed tagged items
may be presented as hyperlinks that enable a user to move to a section of an electronic
document containing that tagged data item. The tagged data items, which may include
names, physical addresses, e-mail addresses, universal resource locators (URLs), dates,
and telephone numbers, may represent a subset of the tagged data item categories
20 contained in the electronic document.
